- Comprehensive, balanced and hands-on Mathematics
- Literature-based Mandarin Chinese
- Supplemental Singapore Math for Upper Grade
- Cooking
- Sports
- Buddy Reading Program
- Interactive & Exciting Excursions

Our Summer Camp offers academic enrichment and invigorating experiences. New to our program this summer will be our bi-weekly themes incorporating STEAM (Science, Technology, Engineering, Art and Mathematics). You will find yourself learning under the themes of People & Culture, Sports, Oceans, Space and Build Day. Under the theme, students will engage in activities in the form of standards-based learning. Students will work with the Common Core Standards in English Language Arts and Mathematics. We will be using a comprehensive and balanced math program, Daily Math, to help prepare students for the next grade level. We will also be using hands-on Math in the form of games, manipulatives and even cooking to support student engagement and learning. In English Language Arts you may find your student in creative writing. They will be working together to summarize stories and challenge their imaginations. We will also be partnering the students in a Buddy Reading Program to grow their skills of working together for a common goal. Along with English Language Arts and Math, Literature-based Mandarin Chinese instruction will be offered to all students (Mandarin Proficiency is not required). Enrichment activities
